SUMMARY

Python Django Developer with hands-on experience in MVC architecture, REST API integration, and responsive full-stack web applications. Currently interning at Prception specializing in Python and Django, with prior production experience in .NET Core MVC, React.js, and freelance client websites. Skilled in backend architecture, database CRUD operations, and Git workflows, seeking a Python Developer role to build scalable applications.

EXPERIENCE

Python Intership Aug 2026 – Present

BlackBox Learning · *Trivandrum*

- Completed practical training in Python and Django, focusing on the Django MVT architecture and full-stack web application development.
- Gained hands-on experience with Django models, views, templates, URL routing, authentication, form validation, and database operations.
- Developed responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Implemented CRUD operations, user authentication, database integration, and application workflows.
- Worked with SQLite and PostgreSQL (Neon) for database management.
- Integrated Gemini API and Groq API to implement AI-powered features and chatbot functionality.
- Used Git and GitHub for version control and project management.
- Deployed Django applications using Render.
- Developed TaskFlow and INKSPACE using Django, implementing real-world features, database operations, and AI integrations.
- Designed and developed a responsive personal portfolio website to showcase professional experience, technical skills, and projects.
- Integrated an AI-powered chatbot into the portfolio to provide visitors with interactive information about projects, skills, and professional background.
- Implemented automated email reminders in TaskFlow to notify users about incomplete tasks when their due dates arrive.
- Developed blog creation and publishing workflows in INKSPACE, including rich text editing and AI-assisted content suggestions.

.Net Developer Dec 2024 – Mar 2026

Ebsor Infosystem Pvt.Ltd · *Malappuram*

- Developed and maintained ERP web applications using ASP.NET Core MVC and .NET Core, following the MVC architecture.
- Developed Master, Transaction, and Report modules with responsive MVC views, forms, data binding, validations, CRUD operations, filtering, and dynamic UI interactions
- Developed and managed ASP.NET Core MVC Controller.cs file to handle HTTP requests, business workflows, API calls, data processing, and communication between views and backend services.
- Integrated and managed REST APIs for data communication between frontend MVC applications and backend services, including API requests, responses, data handling, and error handling.
- Developed Kidonex Customer Feedback & Review handling MVC views, frontend logic, validations, controller implementation, and REST API integration.
- Used Visual Studio for development, debugging, testing, and issue resolution while collaborating with the team to deliver ERP features.

EDUCATION

Calicut University 2018 – 2020

B.Com · 80%

Pass Corporate Training May 2022 – Oct 2022

Diploma In Corporate Accounts & Taxation

G-Tech Education Mar 2024 – Aug 2024

Diploma In Web Designing

Technical: Python, Javascript, Jquery, ASP.NET Core, SQL, React Js, REACT NATIVE, HTML, CSS, SEO, Django Framework, C#, MVT Architecture, MVC Architecture, CRUD Operations, Database Management, SQLite, MSSQL, RESTful APIs, Microsoft SQL Server, PostgreSQL, Technical SEO

Tools & Technologies: Git, VS Code, GitHub, Visual Studio, Bootstrap, Telerik Kendo UI, Tailwind CSS, Neon PostgreSQL, Firebase, Render, Vercel, Gemini API, Groq API

Soft Skills: Problem-Solving, Cross-Functional Team Collaboration, Technical Documentation, Leadership, Analytical Thinking, Communication, Time Management, Decision-Making, Creative Thinking, Work Planning

PROJECTS

TaskFlow – AI-Powered Task Management Application Live

Stack: Python, Django, HTML, CSS, Javascript, PostgreSQL (Neon), Groq API, GIT, Github, Render

Developed a Django-based task management platform with:
- Developed a full-stack task management application using Python and Django to organize tasks and monitor productivity.
- Implemented user authentication, task CRUD operations, priority levels, due dates, and completion tracking.
- Built an interactive dashboard featuring task statistics, productivity reports, and pending task notifications.
- Implemented automated email reminders to notify users about incomplete tasks when their due dates arrive.
- Integrated Groq API to generate AI-powered task suggestions and provide intelligent productivity assistance.
- Integrated Neon PostgreSQL for database management and deployed the application on Render.

INKSPACE – AI-Assisted Blogging Platform

Stack: Python, Django, HTML, CSS, Javascript, SQLite, Gemini API, GIT, Github

Developed a Django-based blogging platform with:
- Developed a full-stack blogging platform using Python and Django for creating, managing, and publishing blog content.
- Implemented user authentication and complete blog management functionality, including create, edit, delete, and view operations.
- Developed blog listing and detail pages with a responsive interface and rich text editing functionality.
- Integrated Gemini API to generate blog title suggestions, content ideas, and AI-powered writing assistance.
- Implemented database operations using Django models and SQLite.
- Designed a clean, responsive user interface with HTML, CSS, and JavaScript.

Aishka cloth Live

Stack: React Js, HTML, CSS, Javascript, Bootstrap

- Developed a responsive clothing website using React.js to showcase fashion products and collections.
- Designed modern, user-friendly interfaces for browsing clothing products.
- Implemented reusable React components and structured page layouts.
- Created responsive designs for desktop, tablet, and mobile devices.
- Improved user experience through clean navigation and visually appealing product presentation.

Urban Escape – Travel Agency Website Live

Stack: HTML, CSS, Javascript, Bootstrap

Urban Escape is a Calicut-based travel agency and tour operator offering comprehensive travel solutions across Kerala, India, and international destinations, including GCC and Asian countries.
- Developed a responsive travel agency website using HTML, CSS, JavaScript, and Bootstrap.
- Designed pages to showcase custom tour packages, travel destinations, and travel experiences.
- Presented services including resort and hotel bookings, cab and traveller rentals, bike rides, and honeymoon packages.
- Organized travel offerings across Kerala, domestic destinations, and international locations.
- Implemented responsive layouts and user-friendly navigation for desktop and mobile devices.

Daybook – Personal Productivity & Habit Tracker Mobile App

Stack: React Native, Expo, JavaScript, SQLite, AsyncStorage, Firebase Authentication

Developed an offline-first mobile application using React Native and Expo to help users organize daily activities and build productive habits.
- Implemented task management with calendar reminders, recurring schedules, and daily task tracking.
- Developed a diary feature with mood selection, tags, and personal entries.
- Built a habit tracker to help users monitor daily routines and progress.
- Created reports to track tasks and productivity.
- Integrated Firebase Authentication for user login while storing application data locally using SQLite and AsyncStorage.
- Designed a responsive mobile interface with a focus on usability and data privacy.
